PROFESSIONAL SUMMARY

Senior Software Tech Lead with **7.9+ years of experience** in architecting scalable distributed systems (1,000+ requests/sec) and enterprise-grade AI solutions. Directed cross-functional teams of **11–15 engineers** to deliver **99.9% system uptime** across platforms serving **50K+ monthly active users**. Expert in Python/Django and Agentic RAG architectures, driving a **30% boost in user retention** through generative AI integration and high-concurrency infrastructure optimization.

PROFESSIONAL EXPERIENCE

7 years and 9 months

HERKEY (Formerly Jobsforher), Bengaluru, Karnataka

05/2023 – Present

Senior Software Tech Lead

Technologies: Python (Django), MongoDB, Delta Lake (Extract, Load, Transform [ELT]), AWS (Rekognition, Transcribe), Redis, Microservices (Kubernetes, Helm), Jenkins, Docker, React (Native), n8n, LangChain, LangGraph,

AI & ML Tools: spaCy, Scikit-learn, Ollama, TensorFlow (Keras), PyTorch, NLTK

Projects: HERKEY 4.0, Jobsforher 3.0, Roadmap, Content Delivery Management, Magic Profanity Detection, Video Conferencing, Payment management system, **Simkey (Agentic AI Assistant)**

- **Architectural Leadership & Strategic Roadmap:** Owned the HLD and roadmap for HERKEY 4.0, directing 15 engineers to achieve 99.9% uptime and a 20% faster time-to-market. Integrated 18% reduction in monthly infrastructure costs through optimized resource allocation.
- **Agentic AI Orchestration (Simkey):** Architected a personalized AI assistant using Agentic RAG that handled 500+ concurrent AI requests. Reduced manual business workflows by 40% via a proprietary Cognitive Context Layer and automated Agentic Fleet.
- **GenAI Production Systems:** Engineered and deployed production generative AI pipelines (RAG/Agentic AI) to power key features, streamlining business workflows and driving a 30% boost in user retention and a 15% increase in user engagement.
- **Scalable Distributed Systems:** Engineered a high-performance API publishing service for video conferencing and payment systems serving **50K+ monthly active users**. Optimized concurrency to handle **1,000+ requests/sec** with a 94% cache efficiency rate, **reducing average API latency by 35%** and significantly lowering infrastructure costs.
- **Automated Trust & Safety:** Spearheaded the **Magic Profanity Detection** engine, leveraging hybrid NLP models (spaCy, Scikit-learn) and **AWS Rekognition** to automate content moderation, significantly reducing manual oversight.
- **Data Engineering Optimization:** Designed scalable ELT/ETL workflows using Delta Lake and Oracle Data Integrator, reducing data processing bottlenecks by 80% and improving the precision of predictive models across the ecosystem.
- **Team Performance & Risk Ownership:** Defined technical standards and managed performance for the team, proactively mitigating 50+ critical security risks across microservices while mentoring junior developers.

SYSTEM DESIGN HIGHLIGHTS

- **Concurrency & Throughput:** Designed a multi-tenant payment gateway capable of processing thousands of transactions with optimistic locking and distributed tracing.
- **High Availability:** Implemented blue-green deployment strategies on Kubernetes, ensuring zero-downtime migrations for core microservices during the HerKey 4.0 launch.
- **Decision Ownership:** Primary technical stakeholder for vendor selections and architectural trade-offs, ensuring alignment between engineering velocity and business KPIs.
- **System Architecture Trade-offs:** Defined and executed architecture trade-offs between monolith and microservices, prioritizing long-term scalability and team velocity.
- **Resilience & Failure Handling:** Engineered system resilience by implementing circuit breakers and distributed retry strategies across core microservices.

Capgemini Pvt Ltd, Bengaluru, Karnataka
Senior Software Developer

08/2021 – 04/2023

Technologies: Python (Django), SQL, JavaScript, Rest API, AWS EC2, REDIS, Data Warehouse (Extract, Transform, Load [ETL])

Projects: AIRBUS Product Lifecycle Management (PLM) Engineering ADB (Assignment Database), DQCM (Design Quality Check Manager), Long Range CLASH, ART (AIRBUS REVIEW TOOL)

- **Global AI-Driven QA:** Developed AI-driven anomaly detection for the Airbus Review Tool (ART), collaborating with European engineering teams to automate quality checks.
- **Architecture Modernization:** Orchestrated the migration of legacy Design Quality Check systems to modern architectures, achieving a 20% reduction in support tickets.

SOFTWILL Infotech Pvt LTD, New Delhi, India

06/2019 – 10/2020

Full Stack Developer

Technologies: Python (Django), PHP (CodeIgniter), SQL, React (Native), AWS, Celery, STRIPE

Projects: ERP, SUGAR CRM, GOeasyrepair, Aquafresh, Softwill Infotech, Echosoftware

- **Architectural API Design:** Built secure, scalable RESTful APIs with RBAC for high-traffic ERP/CRM platforms and automated testing to reduce delivery cycles by 25%.

Bird Global, New Delhi, India

08/2017– 05/2019

Junior Associate Engineer

Technologies: PHP, Python (Django), HTML, CSS, JavaScript, SQL, AWS Client

Projects: Birdglobal, MithilaShop

- **Data Architecture Optimization:** Engineered robust ETL workflows and REST APIs, reducing data processing time by 40% and improving overall system reliability.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

G.L. Bajaj Institute of Technology and Management, Uttar Pradesh—June 2017

SKILLS

- **Backend & Core:** Python (Advanced), Django, Flask, HTML5, CSS3, JavaScript, React Native
- **AI/GenAI Engineering:** LLMs, RAG, LangChain, LangGraph, Ollama, spaCy, TensorFlow, PyTorch
- **Infrastructure & DevOps:** Kubernetes, Docker, Jenkins, AWS (EC2, Rekognition), Linux Automation, CI/CD
- **Databases & Data:** MongoDB, Redis, SQL, ETL/ELT Workflows, Delta Lake, Oracle Data Integrator
- **Leadership & Architecture:** Microservices, Distributed Systems, Agile, SAFe 4, Mentoring, RBAC

CERTIFICATIONS

- **SAFe 4 Practitioner Certification** - Scaled Agile, Inc. Issued Mar 2022 - 2023
- **Continuous Delivery & DevOps** - University of Virginia
- **NLP, generative AI, RAG, LoRA, LangChain, and AI agents.** - Udemy

HONORS & AWARDS

- **Star of the Quarter (Q1 2025)**—Awarded for exceptional leadership and high-impact technical contributions during the HerKey 4.0 migration.
- **SPOT Award (04/2025)**—Recognized for immediate excellence in project delivery and proactive risk mitigation.
- **Employee of the Month (EOTM)**—HerKey (01/2025, 09/2024, 02/2024); achieved multiple recognitions for consistent performance and technical excellence.
- **HerKey Champion: Proactive Award (2024)**—Honored for demonstrating high initiative in identifying and resolving critical system vulnerabilities
